

MISSION, VISION AND VALUES

MISSION

We support our clients in their energy transition through comprehensive, sustainable, and safe solutions, driven by technical expertise, innovation, and rigorous risk management.

VISSION

To be key players in the engineering and turnkey project management sector, recognised internationally for our contribution to sustainability, excellence, and safety.

VALUES

Sustainability

We care for the environment and strive to develop efficient energy solutions that. We are fully aware of the impact of climate change and actively promote resource conservation, efficient management, as well as the minimisation of environmental impact across all our activities. We consider the effect of our actions on the environment and foster initiatives that improve the well-being of the communities where we operate.

Our greatest asset is our **human team** — committed, multidisciplinary, highly qualified, and with extensive experience in managing turnkey projects across various sectors.

We value the personal and professional development of every individual within the organisation and promote well-being as a key element of our corporate culture.

We promote equality and a strong safety culture in the workplace, committing to provide safe, risk-free working environments.

Agility and flexibility

These are distinguishing features of our service model. Our project-based organisational structure is designed to reduce fixed costs, enhance competitiveness, accelerate response times, and prevent delays in project execution.

Excellence

We strive to deliver high-quality services, consistently meeting — and exceeding — our clients' expectations. We are committed to continuous improvement in all areas of our operations and to maintaining excellence in everything we do.

We act with integrity and ethics in all our interactions. We are committed to full compliance with all applicable laws and regulations and to operating responsibly, respecting the interests of all stakeholders, and maintaining honesty in all our relationships.

We are fully committed to what we do and to those with whom we do it.

Technical expertise

Our work is grounded in robust technical knowledge. We encourage creativity and innovation in the search for advanced, efficient technical solutions.

We continuously seek new ways to improve our processes by identifying, analysing, and adopting emerging technologies and innovative approaches to bring competitive advantages to our projects and clients. We collaborate with leading companies and research centres worldwide to deliver the best available technologies and solutions.
